

Keep On Tracking  
You Can't Afford Not To...

## Data Track System™

The **Data Track System™** links accounting software, truck-mounted chips, portable laser barcode scanners, and bar-coded tickets to automate the process of tracking and accounting for loads of fill during excavation and construction.

### The Data Track System™

- Tracks cubic yards and tonnage
- Tracks all material types
- Multiple site locations
- Provides an instant status screen
- Prints detailed reports
- Promotes driver accountability
- Eliminates input errors
